Regenerative Skin & Hair Treatments

PRP (PLATELET-RICH PLASMA) PRP FACIALS & PRP HAIR TREATMENTS

STIMULATE HAIR
GROWTH

Regenerate and rejuvenate using your body's own stem cells and powerful growth factors!

Platelet-Rich Plasma (PRP), derived from your own blood, is infused into the skin to deliver concentrated, natural rejuvenating and reparative factors.

This treatment helps repair old tissue while stimulating the regeneration of new collagen and elastin.

PRP improves skin tone, texture, strength, and overall quality. It effectively treats fine lines, sun damage, age spots, acne scars, enlarged pores, and wrinkles — making it one of the most powerful anti-aging treatments available.

Advanced Laser Hair Removal

GENTLE MAX PRO + CYNOSURE LUTRONIC THE MOST ADVANCED HAIR REMOVAL LASERS IN THE WORLD

The secret lies in the technology.

Our combination of Cynosure, Lutronic, and GentleMax Pro laser hair removal treatments targets and destroys the hair follicles responsible for growth—without damaging the surrounding skin.

The result? Smooth, hair-free skin that lasts. Treatments are virtually painless.

Sessions can take anywhere from 5 to 60 minutes, depending on the size of the area being treated.

A series of 3 to 5 treatments is recommended for optimal results—but every patient is different. Hair grows in three distinct stages, and not all hair is in the same stage at the same time. This means each session only affects a percentage of hair follicles.

To effectively remove all unwanted hair, at least 5 treatments are typically necessary.

Advanced Laser Tattoo Removal

PICOWAY TATTOO REMOVAL LASER THE MOST Advanced TATTOO Removal LASER IN THE WORLD

The secret is in the PicoWay® technology — it treats all tattoo pigment colors and works on all skin types and tones.

The result? Complete tattoo removal.

If you've had tattoo removal treatments before but they couldn't remove your green or blue ink, don't worry — with PicoWay®, you may just need a few more sessions to finish the job.

Treatments can take anywhere from 5 to 60 minutes, depending on the size of the area being treated.

A numbing agent is applied beforehand to ensure a pain-free experience. A series of 3–5 treatments is typically recommended for optimal results, but every patient is different depending on skin tone and tattoo colors.

Wellness IV Treatments

Relax in a comfortable setting as a skilled RN administers a small IV catheter, typically in your arm. A customized blend of fluids, vitamins, and minerals is delivered directly into your bloodstream for fast, effective absorption. Each session lasts 30 to 60 minutes, during which you can unwind, read, or use your phone—then resume your day feeling refreshed. IV therapy offers a range of benefits, including increased energy, enhanced immune support, rapid rehydration, relief from fatigue and migraines, improved nutrient absorption, and faster recovery after surgery, illness, or intense workouts. It's an easy way to support your overall wellness.
